

Data Certification: Bridgeport Fittings (2015-09-18)

	Compliance	eligible items 2,088	completion % 100.0 %	avg. IDW % 18.0 %
---	-------------------	--------------------------------	--------------------------------	-----------------------------

	Excellence	eligible items 2,088	completion % 100.0 %	avg. IDW % 3.0 %
---	-------------------	--------------------------------	--------------------------------	----------------------------

IDEA's Data Certification Program is designed to measure the item-level completeness and quality of data available within the Industry Data Warehouse (IDW). The program focuses on 43 critical fields in the IDW that contain the transactional and descriptive product data distributors need to conduct business and sell manufacturers' products. The 'IDW Compliance Module' and the 'IDW Excellence Module' allow you to see how your company's data measures against industry standards and IDEA best practices at the item level.

Compliance: Confirms that all critical fields are fully populated

Excellence: Confirms that all critical fields meet the expectations for quality, ensuring accuracy and consistency
