

Contractors no longer need to assemble multiple fittings to transition between raceways with Bridgeport solution

4360-DC Raintight EMT to Liquid tight transition couplings now available from 1/2-inch to 2-inch trade sizes in die cast zinc

STRATFORD, Conn. (December 8, 2014) – Bridgeport Fittings has extended its line of 4360-DC Raintight EMT to Liquid tight transition couplings – now available from 1/2-inch to 2-inch trade sizes in die cast zinc. With the Bridgeport solution, contractors no longer need to assemble multiple fittings, or mount a box, to transition between raceways.

Bridgeport's transition couplings are perfect for connecting to HVAC systems, generators, transformers and other rooftop equipment. The fittings can also be used when transitioning between solar arrays and inverters.

Bridgeport's 4360-DC transition couplings are cULus Listed.

Bridgeport Fittings is a leading supplier of quality fittings to the industrial, commercial and residential channels of the electrical industry. Nearly three-quarters of Bridgeport's product volume is manufactured in the U.S.
