

## **Bridgeport Fittings introduces Grounding Lug for Wire Basket Tray**

*ALI-WMCT attaches grounding conductor to cable tray providing continuity for cable tray system*

STRATFORD, Conn. (June 4, 2015) – Bridgeport Fittings introduces the ALI-WMCT grounding lug for wire mesh cable trays. The ALI-WMCT securely attaches #4 - #14 copper and aluminum solid and stranded grounding conductors to a cable tray to provide grounding continuity for the cable tray system and meet NEC Code requirements under Article 250-96(A).

This new grounding lug provides many benefits for improved equipment and personal safety including system noise reduction, as well as transient and fault current removal.

The ALI-WMCT grounding lug comes with a tin-plated aluminum body with 1/4-20 stainless steel hex head set screws. The Bridgeport solution is cULus Listed.

Bridgeport Fittings is a leading supplier of quality fittings to the industrial, commercial and residential channels of the electrical industry. Two-thirds of Bridgeport's product volume is manufactured in the U.S.
