

**Bridgeport's Mighty-Merge® Snap-in/Set Screw Transition Coupling:  
'One fitting that does the work of three'**

*Coupling features set screw end for EMT and  
quick install snap-in for AC/MC cables and flexible metal conduit*

STRATFORD, Conn. (October 17, 2014) – Bridgeport Fittings' Mighty-Merge Snap-in/Set Screw Transition Coupling is one fitting that does the work of three. The patented, cETLus-Listed coupling features a set screw end for EMT and a quick install snap-in end for AC/MC cables and flexible metal conduit.

Bridgeport's zinc die cast coupling is ideal for transitioning fixture whips above a drop ceiling and for continuing the speed of MC down the wall to emergency lights.

The Mighty-Merge Snap-in/Set Screw Transition Coupling is part of Bridgeport's exclusive and innovative "Mighty-B"™ line of high-quality, high-performance products focused on getting a contractor's job "done fast, done right."

Bridgeport Fittings is a leading supplier of quality fittings to the industrial, commercial and residential channels of the electrical industry. Nearly three-quarters of Bridgeport's product volume is manufactured in the U.S.
