

## Offshore to U.S.A Manufacturing (Stratford, CT) Coming Soon

Bridgeport Fittings is committed to remain a U.S. based manufacturer of quality electrical fittings for cable and conduit. We continue to invest in our Stratford, CT, manufacturing operation and process improvements. While it is neither practical nor cost effective to manufacturer everything in the U.S., we are in the process of transitioning a multitude of products from offshore contract manufacturing, typically India or China based, to our U.S. based manufacturing operation in CT.

The following is a current list of the products that are in process:

- **Zinc Die Cast Fitting Locknuts, Trade Sizes 1” through 2”**
  - Target Date Offshore to U.S.A manufacturing – Summer ‘10
  - Proprietary, Unique Fitting Locknut Design to Bridgeport Fittings
  - Trade Size 1-1/2” currently sourced through offshore contract manufacturing using Bridgeport tooling
